The Lyon & Healy Apartment Grand Piano

Here is an instrument that represents the flower of two hundred years of piano evolution. Every other form of the piano, at best, has left something to be desired. This combines every desirable quality, omits none, and adds a number of new features.

That the Grand Piano excels in artistic beauty and musical quality is a fact too well understood to need emphasis.

But the usual size of the Grand Piano has made it prohibitive for the available space of modern homes; the price has been considerably greater than the great majority of music-loving homes could afford; and the tones, adapted particularly to the concert hall, have been too loud for smaller rooms.

In the Lyon & Healy Apartment Grand Piano these three objections to the Grand have been eliminated. The size is reduced to a much smaller space, without in the least detracting from the beauty of the piano as one of the pieces of furniture in a room. The price has been brought within reach of all who can afford a first-class upright piano. And the tones are adjusted to the acoustics of the modern apartment home.

The tremendous demand for Lyon & Healy Apartment Grand Pianos—exceeding our best expectations—is the seal of public approval upon this logical finality in piano building for present-day use.

A most interesting display of these delightful instruments may be seen in this store. Here the various styles may be compared with a view to solving your own problem. There is a choice of woods, including the new lustrous brown mahogany. Be sure to come and inspect them. The recent reductions in price emphasize strikingly that this piano is the logical one for your home.
